VIDEO

MAIN COMPONENTS OF

Vacuum pump

01

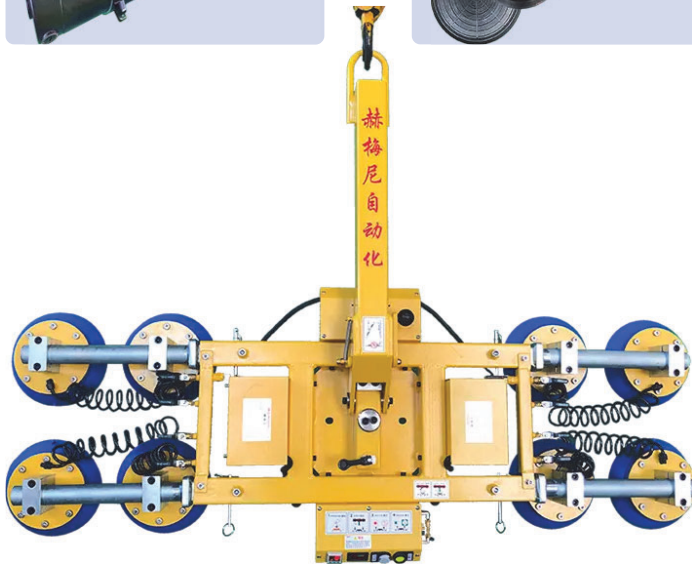

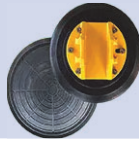

Low energy consumption / High vacuum purity / strong suction Famous brand , Work continuously for 24 hours and it has a more stable performance.

Vacuum suction cup

02

The diameter of the suction cup rubber is 240mm, the material is nitrile rubber, and the three-ring multi-cavity seal is adopted, which has good pressure holding performance and is safer.

Equipment frame

03

The factory is professionally customized / Adopts national standard steel structure profiles / Has been welded, processed, shaped, and baking varnish on the surface, durable.

Other spare parts

04

Internationally renowned brands: CSB Battery, FUJI power switches, SMC check valve, charger, etc. / Comply with UL and other international certifications / Low failure rate, durable.
