

HERCULES

Fire Blanket

Information

Appropriate for kitchens, vehicles, schools, ships & warehouses.

The fire blanket can be wrapped around the body to put out fires during emergency. More importantly, it can also be used to protect the operator from flames during an escape.

Suitable for A and F fire types (Up to 3L)

Does not expire and does not require servicing.

These fire blankets have been tested up to 550 Degrees Celcius

Usage

Off

Pull

Cover

Remove

1. As early as possible, the electric or gas heat source must be turned off.

2. Remove fire blanket from cover and hold the edges of the fire blanket towards you so that your hands do not get burnt.

3. Slowly cover the fire with the fire blanket. Do not throw the blanket!

4. Remove the fire blanket only when it is cool to touch. (Usually 20minutes+)

For cloth fires, wrap blanket around the body.

Discard immediately after use.

Fire Class

Class A

Class F
Up to 3L

Compliance

1869

Fully compliant to EN 1869

Failure to turn off the heat source will result in the fire reigniting.
