Smoke Detector

SAFEHOME TSS380A-H 10 Year HFAD Home Fire Alarm Device

Information

The SafeHome TSS380A is a battery operated smoke detector which utilises a photoelectric sensor. Photoelectric technology allows the detector to be more sensitive to detecting slow smoldering fires which generate thick black smoke and little heat.

The smoke detector has a battery life up to ten years. This battery is non-replaceable.

When low on battery, the smoke detector produces an alarm as a reminder.

Compliance

Meticulously tested in UK, Australia & France

MODEL	TSS380A-H
Battery Life	10 Year Non-Replaceable
Alarm Volume	≥85dB at 3m
Sensor	Photoelectric
Low Battery Warning	Yes
Ceiling Mounting	Yes
Size	Φ120mm * 38mm
Part No
