Excavator Attachment Solutions

Hydraulic Pulverizer: Core Equipment for Building Demolition & Resource Recycling

Industry Positioning

Hydraulic Pulverizer is the core excavator attachment for modern building demolition and resource recycling. It integrates concrete crushing, rebar separation and waste sorting, replacing traditional manual dismantling and blasting. It significantly improves construction efficiency, reduces potential hazards, and facilitates construction waste recycling, serving as key equipment for efficient and eco-friendly engineering construction

Replace traditional manual dismantling & blasting, greatly improve construction efficiency

Concrete Crushing

Powerful clamping force for fast concrete crushing; low noise, low dust, energy-saving and environmental-friendly

Rebar Separation & Recycling

Precisely separate concrete and rebar; powerful magnetic chuck for rebar bundling and recycling

Waste Sorting

All-in-one machine for classified waste treatment, maximizing resource utilization

HOOJO Shanghai Construction Machinery: A Reliable Choice of Made-in-China

Brand Positionin

HOOJO Shanghai Construction Machinery is a leading manufacturer of construction machinery attachments in China. With 20 years of R&D and manufacturing experience in excavator attachments, backed by Shanghai's industrial advantages, we provide reliable demolition solutions for tens of thousands of global customers with strict quality control and multi-scenario technical schemes

Core Competitiveness

Full-model compatible products are elaborately manufactured with high-grade wear-resistant materials and advanced heat treatment. The cost-effectiveness and reliability of "Made in China, Made by HOOJO" make us the trusted choice for global engineering customers

Strict Quality Control

Adopt high-grade wear-resistant materials and custom alloy copper bushings to extend service life and simplify maintenance

Full Series Compatibility

Compatible with 3T - 60T excavators, over 20 models to meet diverse project requirements

Wear-Resistant Technology

Widened & lengthened blade design, wear-resistant and durable, reducing blade replacement frequency

Global Service

Products exported worldwide; complete service network, highly praised by customers

Featured Product: HOOJO HJ30 Hydraulic Pulverizer

Product Specifications	
Model:	HJ30 Hydraulic Pulverizer
Operating Weight:	0.3T
Jaw Opening:	360mm
Compatible Excavator Tonnage:	3–5T Excavators

Indoor Demolition

1

Suitable for small-scale interior decoration and demolition, flexible operation, low noise

Municipal Engineering

2

Suitable for road and canal maintenance & demolition

Landscaping

3

Suitable for vegetation removal, floor tile demolition & renovation, and small civil engineering

Core Advantage 1: Premium Material, Wear-Resistant & Durable

High-Quality Raw Materials

Adopt industry-leading raw material standards to ensure product quality from the source

Wear-Resistant Materials

Custom wear-resistant materials enhance abrasion resistance, extend service life by 50%; excellent impact & fatigue resistance for long-term high-frequency crushing

Alloy Copper Bushings

Custom alloy copper bushing design reduces wear and maintenance costs

Material Upgrade • Maximized Durability

Impact-resistant & fatigue-resistant, supporting long-term high-frequency crushing

Durable • Efficient • Cost-Effective

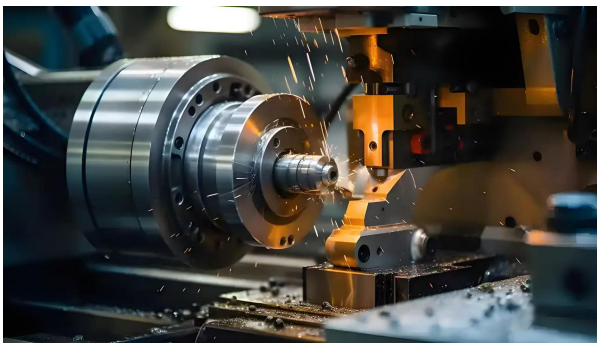

Core Advantage 2: Advanced Technology, Quality Assurance

1

Precision Machining

Advanced equipment

2

Advanced Heat Treatment

toughness, increase product strength by 25%

3

Precision Assembly & Full Inspection

Comprehensive performance testing, zero-defect delivery

4

Standardized Production & Rapid Delivery

Adequate stock ensures stable delivery

1

Precision Machining

Product precision reaches industry-leading level

2

Stability

Low failure rate in continuous operation, excellent stability

3

Adaptability

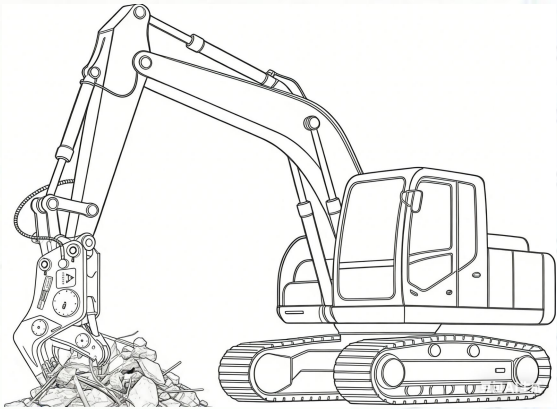

Compatible with 3T–60T excavators, covering various working conditions

Standard Product Specifications: Full Scenario Coverage

Selection Principle

Match model by excavator tonnage to ensure optimal performance and service life

Model	HJ30	HJ50	HJ150	HJ220	HJ350	HJ550
Compatible Excavator Tonnage	3-5T	5-8T	10-17T	20-25T	30-40T	50-60T
Operating Weight	0.3T	0.45T	1T	1.6T	2.45T	6T
Jaw Opening	360mm	460mm	742mm	1015mm	1172mm	1714mm
Application Scenarios	Indoor Demolition, Residential Renovation, Local Crushing, Landscaping	Building Demolition, Pavement Breaking, Trench Construction, Primary Crushing	Factory Demolition, Urban Renewal, Road Expansion, Municipal Construction	Building Demolition, Bridge Breaking, Tunnel Construction, Large-scale Infrastructure	High-rise Demolition, Viaduct Breaking, Airport Renovation, Industrial Infrastructure	Ultra-high-rise Demolition, Large Bridge, Port Construction, Heavy-duty Engineering

Over 20 models, covering 3T–60T full-series excavators, suitable for all working conditions from mini to ultra-large excavators.

Global Service Network & Customer Testimonials

Global Coverage

H00J0 hydraulic pulverizers are exported to Southeast Asia, Middle East, Africa, Europe, USA and worldwide

Perfect Service

Highly praised by global customers for stable performance, high cost-performance and comprehensive service

Continuous Innovation

Continuous technological innovation and product upgrading to provide better demolition solutions for customers

品质赢得信赖·服务铸就口碑

Customer Feedback

-- A Construction Company: We undertake long-term demolition and renovation projects. H00J0 Pulverizers perform excellently in high-intensity operations with strong crushing force and high efficiency. Sturdy, wear-resistant and low failure rate; core components remain intact after 4-5 years of continuous use without frequent maintenance. Reliable, cost-effective, the top choice for demolition

-- A Southeast Asian Construction Company: H00J0 HJ30 Pulverizer performs outstandingly in small-scale demolition projects

-- 95% satisfaction rate in follow-up surveys of domestic municipal and demolition customers
