 **全钣金机身**
T=2mm

 **升级钣金推手**

 **升级超大滚轮**

名义除湿量: 3.12kg/h

The Songkei DI150E industrial dehumidifier is built to tackle large spaces of 200-240 square feet, removing up to 158 liters of moisture per day. It features a robust construction with a Hitachi compressor and a 2mm high-strength steel body. An integrated IC chip provides precise constant temperature and automatic humidity control, while the 0.28mm thick, internally threaded copper piping maximizes heat exchange efficiency – effectively addressing humidity issues in basements, warehouses, garages, and similar environments. For easy portability, this model is equipped with extra-large 25cm rollers and convenient handrails. Safety features include current overload protection, high and low voltage protection, and a power outage memory function, ensuring reliable and stable operation.

Stability and durability are not limited to just being large

Songjing's 5th generation upgraded cart type industrial dehumidifier

2mm high-strength ultra hard sheet metal shell is corrosion-resistant and durable, suitable for industrial sites

Hitachi brand compressor

Powerful dehumidification, overload protection, energy-saving and noise reduction

25cm large roller convenient armrest suitable for various scenarios

Metal wind turbine full arc to fan

Abandoning plastic wind turbines and improving their lifespan

The constant temperature automatic humidity control intelligent control system is equipped with an IC chip for safe humidity control

0.28MM wall thickness internally threaded copper tube

Improve heat exchange efficiency and make dehumidification more efficient

The dehumidification battlefield is advancing straight ahead

Modern tech-savvy color and design, one machine fits all dehumidification scenarios

Underground garage

Large warehouse

Factory workshop

High strength sheet metal body

Through precise CNC machining, the structure is compact. Precision enhancement results in longer durability.

Industrial anti-corrosion treatment and acid-base testing are carried out on the surface.

Finally forming the quality shell of the new generation DI150E in Matsukiyo

Extra-large rollers for convenient handrails

Abandon the traditional small wheels and adopt a reinforced rubber large rear wheel design for easy and effortless movement. Step climbing is no longer difficult. The convenient handrails assist in return transportation for easier movement and better work efficiency

The sheet metal push handles make it easy to move the dehumidifier

Extra-large rollers adapt to various road conditions

25CM

Constant temperature automatic humidity control

When the environmental humidity is higher than the set humidity

Automatically turn on the compressor for dehumidification, otherwise automatically turn off the compressor

Environmental humidity 58%

Environmental humidity 52%

Environmental humidity > set humidity

Automatic dehumidification

Environmental humidity < set humidity

Automatically turn off the compressor

No need to be on duty, efficient dehumidification 24/7

A LARGE AREA OF DEHUMIDIFICATION IS EFFECTIVE FOR 10 MINUTES

200m²

Construction site basement

Rapid stabilization of humidity ensures safe construction operations

10min

Quick and effective dehumidification

Support 35 day continuous dehumidification, safe and stable operation

Current overload protection

High and low voltage protection

Automated frost function

Power off memory function

Dehumidification and odor
removal for decoration, no
need to wait for long

140m²

Medium to large area in 140m decoration, quick drying of paint in one day, reducing odors, strong wind circulation dehumidification, smoother paint surface, and less bitter odor in the new house

Craftsmanship and detail achieve quality

THE DETAILS OF ACHIEVEMENTS IN QUALITY CRAFTSMANSHIP

Songjing carefully builds every machine

Brilliant color screen

Display the machine's operating status at all times with clear functions at a glance

High density filter screen

Effectively filtering particles and dust in the air to reduce damage to circuits and extend machine life
