

(START & STOP Starter Battery) EFB S95 (12V 70Ah)

Rocket START-STOP Maintenance Free BATTERIES - an advanced engine technologies demand advanced batteries. Besides supporting the significantly-increased engine starts, the battery also ensures reliable power is delivered to the vehicle's electric systems during engine stops. Rocket EFB batteries (Enhanced Flooded Battery) are suitable for new car START & STOP technologies and allow you to save fuel 5 ~ 10%.

Design Features

- Special additives - Improved charging acceptance.
- High pure electrolyte - Low water loss.
- Special double lid - Maintenance free and proof against 50° tilt.
- Rolled full frame grid - High conductivity and high corrosion resistant.

Performance Characteristics		
General Information	Length	260 mm
	Width	173 mm
	Total Height (include Terminal)	225 mm
	Approx Weight	18.7 kg
	Nominal Voltage	12 Volt
	Number of Cells	6
	Nominal Capacity (20 hour rate)	70 Ah
	Nominal Capacity (5 hour rate)	---
	Cold Cranking Amps @ -18°C	680
	Cranking Amps @ 0°C	---
	Reserve Capacity	130 minutes
	Terminal	STD
	Battery Standard	EFB JIS
