

(START & STOP Starter Battery) AGM L4 (12V 80Ah)

Rocket START-STOP Maintenance Free BATTERIES - an advanced engine technologies demand advanced batteries. Besides supporting the significantly-increased engine starts, the battery also ensures reliable power is delivered to the vehicle's electric systems during engine stops. Rocket AGM batteries (Absorbed Glass Mat Battery) are suitable for new car START & STOP technologies and allow you to save fuel 5 ~ 10%.

Design Features

- High density paste - Anti softening.
- Terminal structure - Corrosion resistant & prevent leak.
- Special additives - Improved charging acceptance and minimizing water loss.
- AGM separator - Low electrical resistance & high ionic conductivity.

General Information	Performance Characteristics	
	Length	315 mm
	Width	175 mm
	Total Height (include Terminal)	190 mm
	Approx Weight	23 kg
	Nominal Voltage	12 Volt
	Number of Cells	6
	Nominal Capacity (20 hour rate)	80 Ah
	Nominal Capacity (5 hour rate)	---
	Cold Cranking Amps @ -18°C (SAE)	---
	Cold Cranking Amps @ -18°C (EN)	800
	Reserve Capacity	140 minutes
	Terminal	STD
	Battery Standard	AGM DIN
