

Yanmar diesel engine

Poclain hydraulic plunger pump

Danfoss hydraulic motor,
Four wheels driving

The hopper is welded by Mn alloy steel plate, with high strength

The hopper controlled by hydraulic cylinder

The hopper can rotate 180° and can be tilted forward, leftward, and rightward

Walking reversing mechanism with a neutral locking function ensures safe start of the machine

Integrated micro computer control panel which can realize various functions such as operation, monitoring and alarm

With LED high-intensity lighting for night construction

Weight		lubricating L	3.4L
Loading capacity	1500kg	Fuel consumption	286g / kWh
Light weight	1510kg	Property parameters	
Engine		Speed	14km / h
Model	Yanmar 3TNV76	Turning radius	3060mm
Type	Diesel engine, water-cooled 4-stroke, three-cylinder	Climbing capacity in theory	40%
Power	18.7kw	Dimension	
Fuel tank volume	30L	Maximum overall dimension	3240 × 1450 × 2400mm
