

Bronto Skylift F-HDT range

RELIABLE AND READY FOR ALL SITUATIONS

Reliability in all situations

Bronto Skylift HDT is an all-round aerial ladder platform for fire departments and industrial fire brigades. The HDT can be described as a reliable workhorse, that's simple to use and always ready for any rescue situation.

Heavy Duty Telescopic (HDT)

The HDT units range in height from 32 to 54 metres and can be mounted on all major chassis brands. Their compact structure allows them to reach the required destination easily with zero tail-swing and they provide a good up-and-over capability.

Everything essential is always on board: a fully equipped rescue cage, a high-capacity waterline and rescue ladders. Optional accessories available for the cage include powerful work lights, a rescue chute, power outlets for electricity, compressed air and hydraulics for tools, and a breathing air outlet for safe rescue and extinguish missions.

The unit can be equipped with any commercial fire pump, water/foam tanks and foam systems. The up-and-over reach of the aerial platform is an invaluable feature when working over roofs and parapets.

Based on the many features and benefits, it is no wonder that the HDT units are used today in over 100 countries and on all continents. As one of the most reliable aerial ladder platform on the market, they are preferred by fire brigades throughout the world.

HDT range key features

- Reliable, durable and simple to use
- Compact structure allows to reach the required destination easily
- Up and running in just 30 seconds
- Zero tail-swing and good up-and-over capability
- Fully equipped rescue cage
- High-capacity waterline and rescue ladders
- Can be built on all major chassis brands
- Can be equipped with any commercial fire pump, water/foam tanks and foam systems

Services for added safety and efficiency

For optimal performance and your safety, it pays off to take the best possible care of your Bronto platform.

The widest service network in the industry keeps you backed up wherever you are. With a Bronto Service agreement, you can be assured that your Bronto equipment is kept in the best possible shape for its entire lifetime. The content of the mutual agreement can be fully customised according to your needs. It can cover the annual inspections and service visits, but it can also include more detailed inspections, other maintenance activities and spare parts.

When the emergency arises, confidence in operator skills is crucial. For your teams safety our IPAF-certified field engineers provide operator and maintenance training for all new units. Content, location and the depth of the training can be tailored and additional training is always available where ever you need it.

Various options

- Breathing air, electricity and hydraulics in the cage
- Emergency back-up system
- Detachable winches
- Stretcher carrier
- Ultrasonic collision guard
- Various working lights and camera options
- Bronto Loadman to measure ground bearing

(simplified selection)

Safety above all

Bronto Skylift is a trusted global supplier of truck-mounted hydraulic platforms. We design, manufacture, sell and service appliances for rescue and firefighting, as well as for industrial access.

Our product range includes approximately 50 models with a range of 17 to 112 metres of working height. The advanced modularity also allows for numerous client-specific modifications. During the past 50 years, we have delivered over 7,000 platform units to fire brigades and industrial customers throughout all the continents in more than 120 countries.

Our headquarters and production plants are situated in Finland. We also have subsidiaries in Germany, Sweden, Switzerland and the US. The company is part of the Japan-based Morita Holdings Corporation.
