

Product Description

Model	EG202AK
Passenger Capacity	2
Voltage(V)	36/48
Overall Dimensions(mm)	2870*1180*1850
Max.Loading Weight (kg)	320
Climbing Ablty (loaded)	≥20%
Driving range (km)	≥50
Max.Speed (km/h)	32+10%

Products Details

The front of the golf cart headlights

We can customize various colors according to users' demands

The rear of the golf cart

Customize various types of rear vehicles with different functions, including multi-functional golf carts, golf carts with cargo boxes, golf carts with beds, and golf carts with drink boxes.

Other details of the golf cart

The wheels and interiors of different car models also vary

Street Legal Golf Carts & Utility Golf Cart Solutions by EG Vehicles

Lightweight Design & Structural Integrity

The aluminum alloy chassis and wheelbase significantly reduce overall vehicle weight while maintaining durability¹.

A unibody full-plastic body structure enhances structural cohesion, optimizing the balance between lightweight design and robustness for street legal golf carts¹.

Enhanced Performance & Practicality

The double-wishbone independent suspension system ensures stability and comfort on rough terrain, making it ideal for utility golf cart applications¹.

Strategically placed cup holders and modular storage compartments improve daily usability, catering to diverse user needs.

Modern Aesthetics & Functional Tech

An intuitive LCD dashboard provides real-time driving data, ensuring clarity and safety for operators¹.

Sleek LED daytime running lights and taillights elevate the visual appeal, aligning with contemporary design trends in golf cart manufacturer offerings.

Customization & Versatility

This series resolves the technical conflict between product personalization and standardization, offering scalable configurations.

Modular seating and interchangeable components allow seamless transformation into multi-purpose layouts, meeting demands for both leisure and commercial street legal golf carts
